Prerequisite

- Reading the entire tutorial before starting to bead
- Strong beadweaving experience
- Cubic Right-angle weave helps

Material List

 for a Bangle size ~ 8 5/8" (21.8cm) long before zipping

-  6.50 gr 3.4 Drop or Fringe beads, DB
-  9 gr MiniDuo, MD
-  3 gr 11/0 purple seedbeads, SB
- Beading thread – You may use your preferred beading thread. I used a double nylon thread.

Legend

MD – MiniDuo

SB – Seedbead

DB – Drop bead

Designer's notes:

- The measurements provided here are based on the widest part of a hand that is 7 5/8" (19.8 cm). Remember that the bangle is a bit flexible and will roll on your hand to fit. To understand how to measure a fit of a bangle, this link, at the specific time of 10:09 might help- <https://youtu.be/rqEHT1C9kD4>
- There are 32 rows in this bangle (before and after zipping).
- Check out that both holes of MiniDuos are clear before starting.
- Finishing the thread – My favorite way is to weave the thread throughout my work in different directions until I am satisfied.

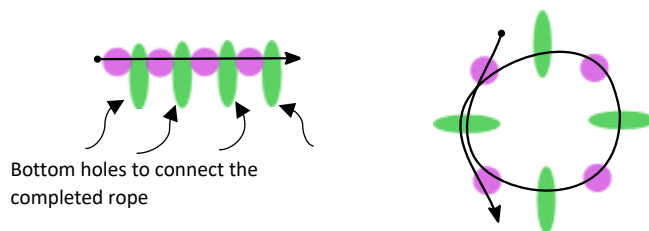

If you prefer to tie, glue, put nail polish or else, please do so.
Any method that works for you is fine.

- If you print the tutorial, I recommend printing in color for better view of diagrams and pictures.
- Refer to the diagrams/pictures in each step.

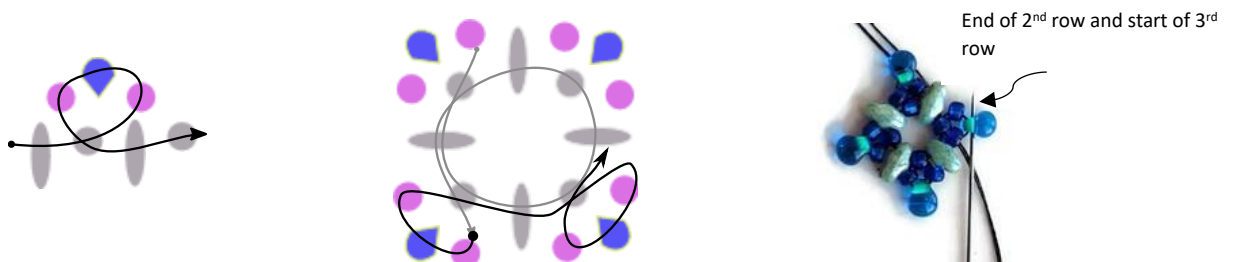

Bangle Rope

- ✓ Thread length – Personal preference is recommended. Leave a tail long enough to be secured later.

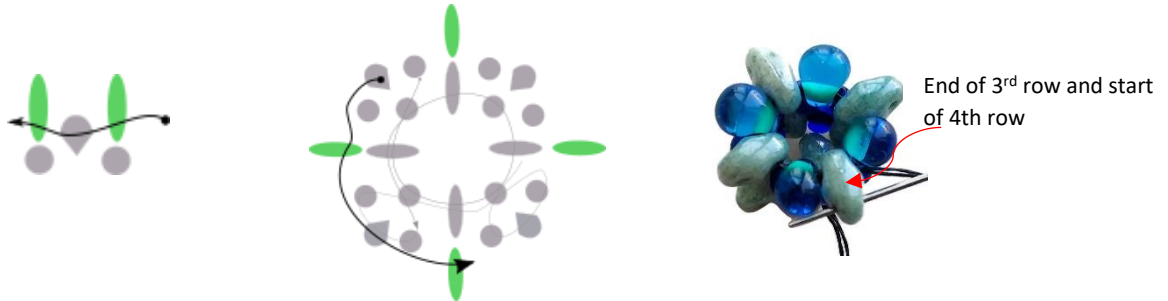

Step 1 *First row* – String an SB and an MD. Repeat 3 more times. Pass through the first SB and MD to make a tight circle. Come out the next SB.

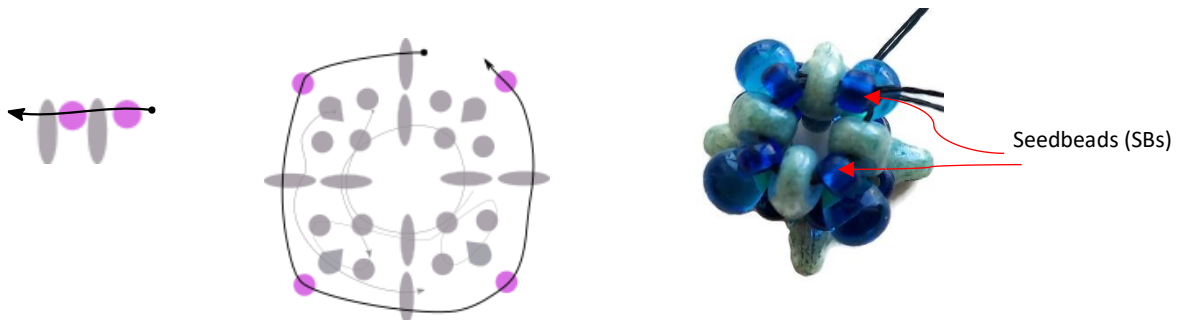

Step 2 *Second row* – String a SB, DB and a SB. Pass through the SB you came out from and the next MD and SB. Repeat 3 more times. At the end of the row, go up through the first SB of the set and the DB.

Step 3 *Third row* – At this row your rope will start to get its square shape. Pickup 1 MD and pass through the next DB. Continue to end of row. Pass through the first MD and up to its empty hole.

Step 4 – *Fourth row* Pickup one SB and pass through the next MD. Repeat to end of row and come out the next SB.

Step 5 – Repeat steps 2-4 To desired length. The last row of the rope should be the same as the *Second row* in step 2 and the thread is coming out from a DB.

- Length of rope before zipping is ~8 5/8" (21.8cm) This depends on tension and it may vary. As you measure your own fit, this is the time to remove or add rows, before zipping.

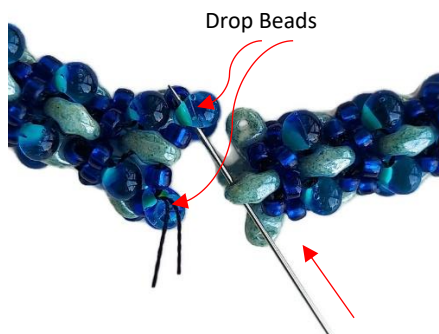

Zippering the ends of the Rope

- Line up both ends of the rope in such away that they are on the same sides of the square, as in the picture below.
- Allign the beads from the First and Last rows, (logically they are

First row and Second row pattern) as in the picture above.

- Holding the working thread coming out of a DB, pass through the empty hole of the MD in the tail end of the rope and through the next DB.

- Continu all the way around and pull tight.
- Secure the thread.

Color way 1

- 11/0 SB #419 purple
- MiniDuo Lava M MA
- 3.4 Drop beads – OP turquoise

Color way 2

- 11/0 SB #D4470 Miyuki red
- MiniDuo Lava M MA
- 3.4 Drop beads – FB D4201 silver duracoat

Color way 3

- 11/0 SB 460D
- MiniDuo Pink
- 3.4 Drop beads Ruby Picasso

Color way 4

- 11/0 SB 46A midnight blue
- MiniDuo Chalk green luster
- 3.4 Drop beads capri C/L mint
