MATERIALS:

- 11/0 seed beads (code: 11sb) **about 2 grams or less** 
-
- 15/0 seed beads (code: 15sb) **about 3 grams or less** 
-
- Superduo. **(amount: 16)**
- 2mm true cuts (code: 2tc) 
- 3 mm bicone crystal (code: 3bc) **amount: 48**
- 4mm bicone crystal color A (code: 4bca) **amount: 22**
- 4mm bicone crystal color B (code: 4bcb) amount: 8
- 4mm rondelles (code: 4rc) **amount: 102**
- **2mm rondelles (code: 2rc) amount: 130**
- 10 mm pearl drop (head of the doll) **amount: 1**
- Body of the doll

Lady Josephine

STEP 1

Take four 3bc, make a knot shaping and square and come out for one of the crystals.

STEP 2

Then making right angle weave, add 3 more 3bc and pass back through the same crystal that you are but in the opposite side, then travel for two more crystal to go on top (on the point of the 3 crystals added) and repeat this process until you have 7 squares.

STEP 3

Come out on the point of the last right angle that you made it, add one 3bc and pass through the point of the right angle in the other side.

Add one 3bc more and pass back through the point of the right angle that we start but in the opposite side of the crystal, then with the doll inside tighten. You will have 8 right angle.

STEP 4

Come out in one of the crystal add one 15sb and pass through the next crystal, repeat this process all around on the top and the bottom of your right angle.

STEP 5

Come out in one of the crystals on the top take three 2rc and pass through the same crystal but in the opposite side.

STEP 6

Travel to the next 3bc, add two 2rc and pass through the 2rc next to the 3bc and for the 3bc too but in the opposite side.

Repeat this process 5 more times then to close between side A and side B, come out in the last 2rc in the side A, add one 2rc en pass through the next 2rc in the side B you will have 8 points. Repeat step 6 in the bottom too.

STEP 7

Repeat step 6 on the top but this time using 2tc.

STEP 8

Come out in 2tc placed next to the arm, then add three 2rc and pass back through the same crystal but in the opposite side. Travel to the top of the three 2rc previously added.

STEP 9

Repeat step 8 three more times until you have 4 right angle.

STEP 10

Travel to the top of the three 2rc that you previously added, add one more and pass through the 2tc placed in the back of the doll, then add one more 2rc and pass back through the 2rc that we star but in the opposite side.

STEP 11

Travel to the 2rc in the point of the outside of the arm of the doll, and start a new row of right angle weave attached to the one that we made in step 9 and 10.

STEP 12

Travel to the outside and start another row of right angle weave but this time using for the first three: one 2tc + one 11sb + one 2tc, and for the next of two one 2tc + one 11sb (the 11sb must be always on top). Then come out in the first 2tc and add one 15sb + one 3bc + one 15sb and pass through the next 2tc.

STEP 13

Travel to the other arm of the doll and repeat steps 8 to 12.

STEP 14

Fill the space between crystals using two 15sb, then go to the other side and repeat.

STEP 15

Travel to the 4bc come out in one of the points in the bottom side of the doll, and repeat steps 5 to 6, (you will have 8 right angle weave made).

STEP 16

Repeat previous step but this time using 4bc. (8 right angle weave)

STEP 17

Now we have to travel to the bottom you will have 8 crystals, come out in the crystals placed just between the legs of the doll, add one 4bc and pass through the 4bc in front, making sure that the crystals in front is just the middle, then add one 4bc and pass back through the 4bc that we star but in the opposite side, now your legs will be separate by this process each leg will be between 4 crystals.

MAKING THE LEGS USING CUBIC RIGHT ANGLE WEAVE

First a explanation of how to make the cubic in the doll, in the explanation we will use 8/0 seed beads, but this is just for the picture, so you can see better what we are doing,, when you start to make the legs you have to use 4mm rondelles, no 8/0 seed beads.

Come out in one of the 4 crystals that are around the leg of the doll add three 4rc and pass through the same crystals but in the opposite side, then travel to the next second 4bc of the 4th.

Add to 4rc and pass through the last 4rc of the three previously added and through the same crystal that we are but in the opposite side. Travel to the third 4bc of the base of 4.

Repeat same previous process (add two 4rc and pass through the last 4rc of the 2 added previously and for the crystals that we are but in the opposite side. Then travel to the 4th crystal and the go up for the first 4rc.

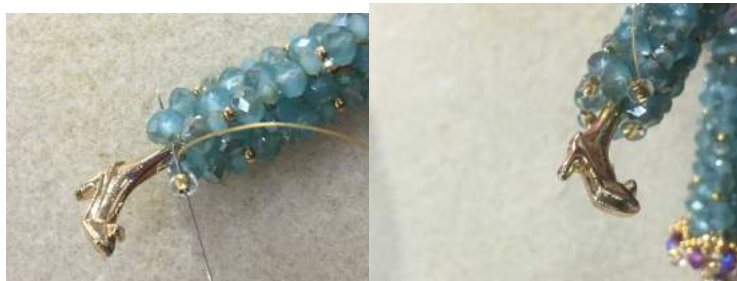

Add one 4rc and go down passing through the 4rc in front, you will have 4 crystals on top, to make a new row of cubic travel to one of the new 4 crystals added and start again the process.

STEP 18

Following the process previously described you have to make 6 rows of cubic right angle weave, using 4rc, Then fill the spaces between crystals using 2rc in one space and one 11sb in the other, continue in this way until you have filled all the sides of your cubic

STEP 19

Travel to the last cubic that we made, come out in one of the 4rc, add one 8sb and pass through the next 4rc, repeat 3 more times, until you have four 8sb placed.

STEP 20

Come out in one of the 8sb, add seven 15sb and pass through the next 8sb making an arc over the 4rc, repeat this 3 more times, until you have 4 arc.

STEP 21

Come out in one of the 8sb, add two 15sb + one 3bc + one 15sb and pass through the 4th seed bead in the arc of seven (the 4th seed beads is the point), then you have to do inverse, coming out in the point of the arc of seven, add one 15sb + one 3bc + two 15sb and pass through the next 8sb, repeat this process until you have placed 8bc.

STEP 22

Come out in one of the 4bc added in the previous step, add one 8sb and pass through the next 3bc, repeat until you have eight 8sb placed. Then go to the other side and make the other side to make the other pant sleeve repeating steps 18 to 22.

You doll will look like this

STEP 23 (THE HAT)

Take eight 4bc and eight 11sb alternating between then make a knot.

STEP 24

Come out in one of the 11sb, add three 15sb + one 11sb + three 15sb and pass through the next 11sb, making an arc of seven seed beads over the crystal, repeat this step 7 more times.

STEP 25

Travel to the 11sb in the arc of seven placed just in the point, add one 2rc and pass through the 11sb placed in the next arc of seven, repeat this process seven more times.

STEP 26

Come out in the 11sb placed between crystals, add five 15sb and pass through the next 11sb, the next crystal and the next 11sb.

STEP 27

Repeat step 26 three more times, you will have 4 arcs of 5 seed beads.

STEP 28

Come out in the third seed bead of the arc of five (the point), add one 11sb and pass through the next point, repeat this process 3 more times.

STEP 29

Come out in one of the 11sb placed between 4bc, add three 15sb + one 11sb + three 15sb, and pass through the next 11sb, repeat this process seven more times.

STEP 30

Travel to the 11sb placed in the point of the arc of seven, add 2 superduos and pass through the next 11 in the next arc of seven, repeat this process 7 more times.

STEP 31

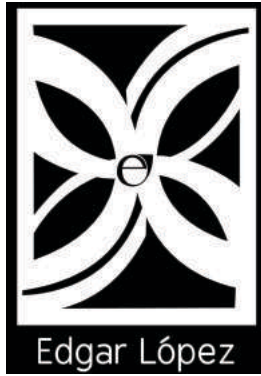

Travel to the second hole of the superduos and add one 4rc and pass through the next superduo and add this time a 2rc, continue making this process all around alternating between sizes.

STEP 32

The hat is finished to put it into the drop (doll head) put the drop into the wire of the doll, then the hat and then make a lop.

Edgar López

LADY OF THE 50'S

STEP 1

Take four 3bc and make a knot to make a square.

STEP 2

Come out in one of the crystals, add three 3bc and pass through the same crystal, but in the opposite hole (right angle weave), repeat this process 5 more times, until you have 7 square.

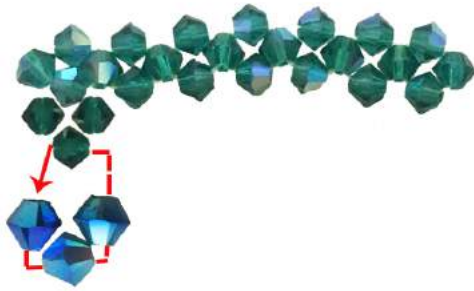

STEP 3

Travel to the first crystal added in the last step (crystal in the bottom of the line), then add three more 3bc and pass through the same crystal but in the opposite hole (right angle weave).

STEP 4

Travel to the second crystal added in previous step and repeat step 3 but this time using 4bc.

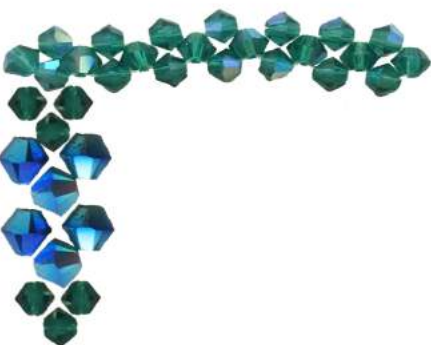

STEP 5

repeat step 4.

Travel to the second 4bc and

STEP 6

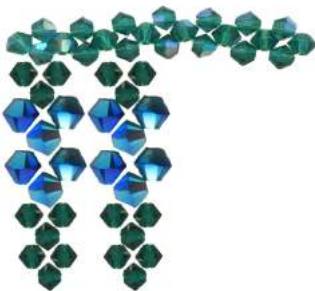

Travel to the second 4bc and repeat the same process but this time using 3bc.

STEP 7

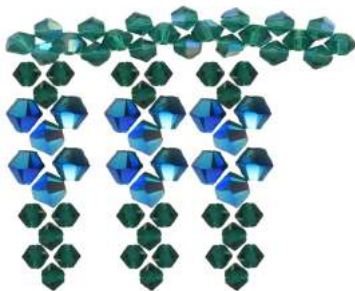

Travel to the second 3bc and repeat step 6.

STEP 8

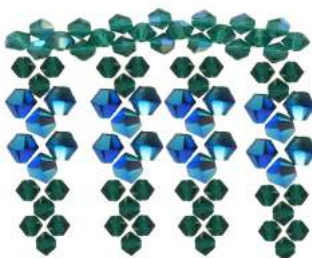

Travel to the third square of seven in the main right angle weave made with 3bc, and come out in the 3bc placed in the bottom parallel to the crystal that we start to made our column of right angle (that means that you have to skip the second square and work in the third), and repeat steps 3 to 7.

STEP 9

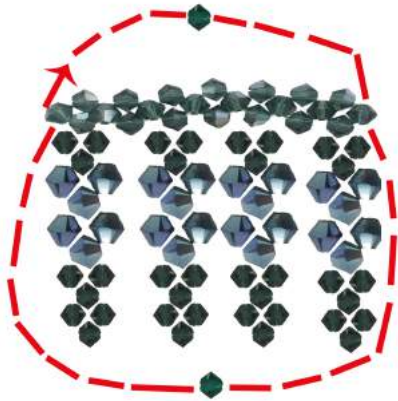

Continuing with the same process, skip the 4th square and travel to the 5th and repeat step 8.

STEP 10

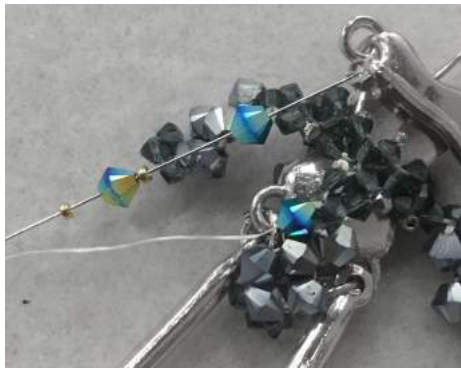

Travel to the 7th square and repeat step 9. Now we have 4 columns of right angle weave.

STEP 11

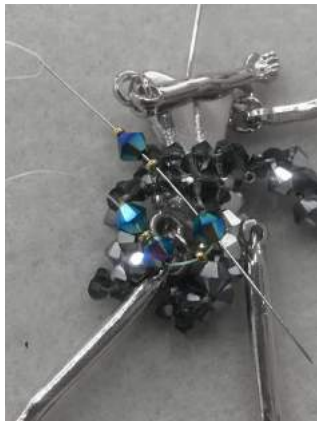

Now is time to attach both sides of the main right angle of 7 squares, for that come out in the 3bc placed in one of the sides, add one 3bc and pass through for the 3bc placed in the other side, then add one 3bc and pass back through the 3bc that we start, before you tightening you have to place the body of the doll into the circle formed by the right angle, then tighten in the waist of the doll.

STEP 12

Now we have to attach the first right angle made with 4bc in all the 4 columns made in the previous steps, for that travel to one of the 4bc, add one 15sb+one 4bc+ one 15sb and pass through the 4bc in front in the other column.

STEP 13

Add one 15sb+one 4bc+one 15sb and pass through the 4bc that we start, repeat steps 12 to 13 in all the columns.

STEP 14

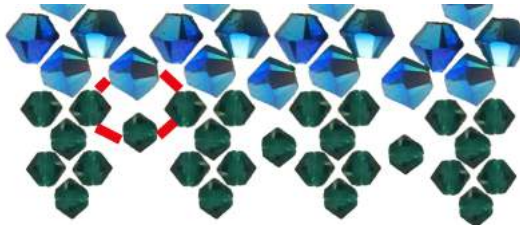

Now we have to attach the second right angle made with 4bc, travel to the 4bc of the second right angle, and using 15sb attach the 4bc placed in the step 12, with the 4bc of each column, then travel to the bottom side of the 4bc in one of the columns, add one 2mm true cut + one 4bc + one 2mm true cut and pass through the 4bc in the other column, repeat this 3 more times in each column.

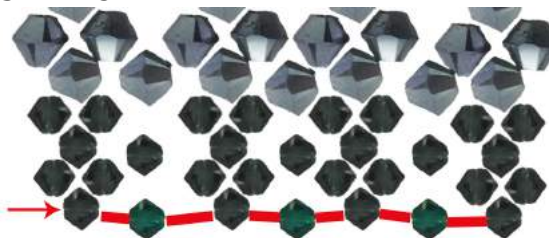

This is how looks.

STEP 14

To attach the next line of 3mm crystals in the columns, repeat the same process of step 13 but this time just using to 3bc to attach.

STEP 15

To attach the last line of the 3mm crystals, travel to the 3bc on the point of the column add one 3bc and pass through the 3bc placed in the point of the next column, repeat this process 3 more times until you attach the 4 points of the column.

STEP 16

Now add one 15sb between each 3bc placed in the previous step.

This is the result.

STEP 17

Next is make a right angle on the bottom, for that come out in one of the 3bc, add one 3bc + one 4bc + one 3bc and pass through the same 3bc that we start but in the opposite side.

Travel to the next 3bc, add one 3bc + one 4bc and pass through the 3bc placed before and the 3bc that you start, repeat this process 6 more times.

To finish the step, attach the last two 3bc using one 4bc.

STEP 18

Come out in one of the 4bc placed in the previous step, add one 2tc + one 3bc + one 2tc and pass through the same 4bc but in the opposite side.

STEP 19

Add one 11sb and pass through the next 4bc.

STEP 20

Repeat steps 18 and 19 in each 4bc.

This will be the result.

STEP 21

Come out in one of the 3bc placed in the previous step add 2 long Magatamas and pass through the next 3bc, repeat this process all around.

Your doll will look like this.

STEP 22

Now we have to work on the top of the doll, for that come out in the 3bc placed in under the breast of the doll, add three 3bc and pass through the same crystal in the opposite side (right angle), travel to the second of the 3 crystals placed and repeat this process 3 more times. Then attach this new column to the backside of the doll, with the 3bc that match.

STEP 23

Repeat step 22 in the other side of the doll.

STEP 24

Add 15sb to fill the spaces between crystals on the top of the doll.

STEP 25

Now is time to make the sleeves, for that travel to 15sb placed on top of one of the sides on the top of the doll, add four 15sb + one 2tc + four 15sb and pass through the 15sb on top in the other side of the doll.

STEP 26

Come out in the same 15sb used in the previous step add six 15sb + one 2tc + six 15sb and repeat the same process that step 25, then travel to the 3bc next to the 15sb in the one of the sides.

STEP 27

Repeat step 25 and 26 but this time using eight 15 + one 2tc + eight 15sb.

STEP 28

Repeat step 25 to 27 to make the sleeve of the other side.

STEP 29

Add the drop.

THE HAT

STEP 30

Take one 3bc + one 11sb until you have 10 of each one, and make a circle, make a knot.

STEP 31

Come out in one of the 11sb, add five 15sb and pass through the next 11sb, repeat this process 9 more times.

STEP 32

Travel to the point of the arc of five 15sb (third seed bead), add one 2tc and pass through the next point.

Add one 15sb and pass through the next point.

STEP 33

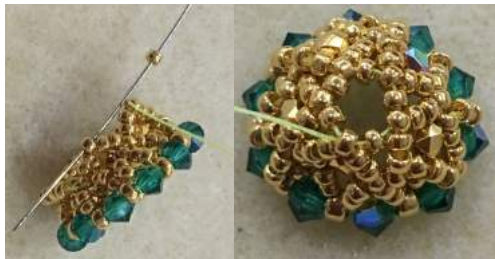

Repeat step 32 alternating between 2tc and 15sb, then tighten.

STEP 34

Come out in one of the seed beads before the 2tc, add five 15sb and pass through the seed bead after the 2tc (making an arc of 5 seed beads over the 2tc), repeat this process in all the five 2tc.

STEP 35

Attach all the points using 15sb.

STEP 36

For this embellishment we are using 3 of the seed beads of the on the top of the hat, first come out in one of the seed beads add three 15sb + one 3bc + three 15sb and pass through the same seed beads but in the opposite side, then travel to the next the seed bead on the top repeat the same process but this time using five 15sb + one 3bc + five 15sb, then travel to the next seed bead on the top of the hat and repeat the same process but this time using seven 15sb + 3bc + seven 15sb.

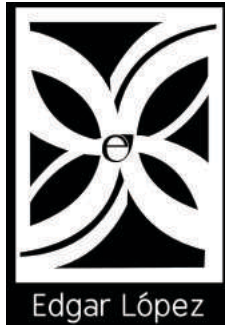

STEP 37

Put the hat over the drop entering the pin of the doll for the hole of the hat, then travel to the 11sb placed in the bottom of the hat between the 3bc, then add five 15sb and pass through the next 11sb, repeat this step nine more times. Make a loop in the pin to hold the hat and the drop and your doll will be finished.

DHARIANA DOLL PENDANT

DHARIANA DOLL PENDANT MATERIALS

MATERIALS FOR THE DOLL:

- 1-Rondelle crystals 1mm, (one string). Color A (code: 1rc)
- 2-Square or rondelle crystals 2mm (48). (code:2rca)
- 3-Rondelle crystals 2mm (24). (code: 2rcb)
- 4-Rondelle crystals 3mm (24). (code:3rc)
- 5-Rondelle crystals 4mm (48). (code:4rc)
- 6-Bicone crystals 4mm. (48). (code:4bc)
- 7-Delica 11/0.
- 8-Seed beads 11/0. (code:11sb)
- 9-Seed beads 8/0. (code:8sb)
- 10 Seed beads 15/0. (code:15sb)
- 11-Doll.
- 12-Pearl Drop 8mm.

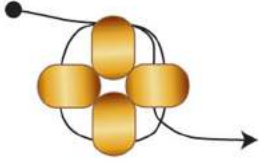

MATERIALS FOR THE BAG:

- 1- Rondelle crystals 1mm (18).
- 2- Square crystals 2mm (18).
- 3- Rondelle crystals 3mm (18).
- 4- Bicone crystals 4mm (9).
- 5- 15/0 seed beads.
- 6- 11/0 seed beads.
- 7- 8/0 seed beads.

STEP 1

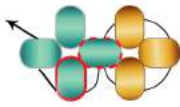

First we have to make a right angle weave, using 15/0 seed beads.

1-a

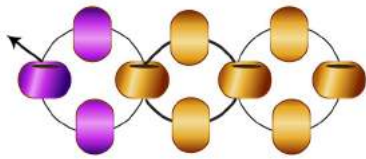

Take four 15sb, make a know and come out in one of the seed beads.

1-b

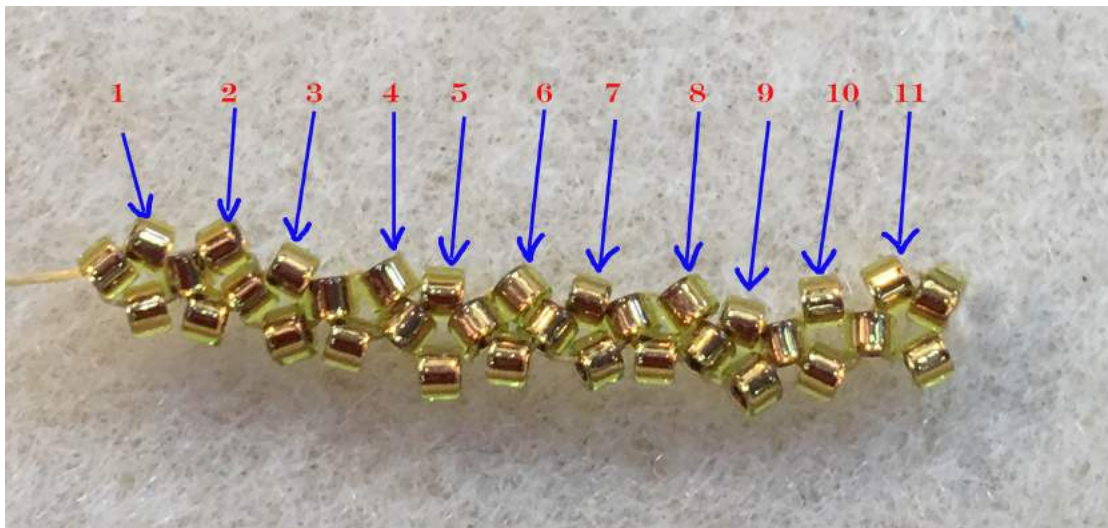

Add three 15/0 seed beads and pass through the same seed that you are but in the opposite side, then travel for 2 more seed beads and come out in the seed bead placed in the center of the three that you added.

1-c

Repeat step 1-b until you have made 11 square of right angle.

STEP 2

Now you have to attach the sides of the right angle, for that come out in the seed bead in placed in the point of your last right angle, add one 15sb and pass through the point of the other side of your right angle, add another 15sb and pass through the point of the seed bead that we start. Before you tightening, insert the wrist inside the circle formed by the right angle then tighten.

STEP 3

Now we will make another right angle attached to the one made with seed beads. Come out in the seed bead placed in the down side of the doll, add three 1rc, and pass through the same seed bead but in the opposite side.

STEP 4

Go to the next 15sb placed in the point in the down side of the doll, add two 1rc and pass through the previous 1rc placed before and for the same 1rc that you are but in the opposite side. Repeat this step 9 more times until you have only one 15sb on the point in the down side of the doll.

STEP 5

To close your right angle you have to attach both sides, for that go up on the last 1rc placed before, then add one 1rc and pass through the 1rc just in front.

At this moment your doll will look like this.

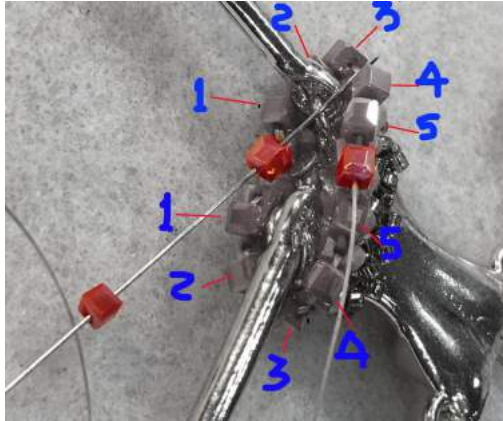

You have to have 12 crystals on the points.

STEP 6

Repeat steps 3 to 5, but this time using 2rc. When you finish you have to have 12 crystals on the points.

STEP 7

Now we have to close the right angle in the center, for that go to the crystal on the point placed just in the center between the legs of the doll, then add one 2rc and pass through the 2rc in front (notice that you have to have 5 crystals on the point in each side).

Add one 2rc and pass through the 2rc that we started.

Your doll looks like this, and is time to make each side of the pant.

Each side of the pant will have 6 crystals, to make the pants we will make prismatic right angle around the 6 crystals.

PRISMATIC RIGH ANGLE WEAVE WITH 6 CRYSTALS TUTORIAL

A

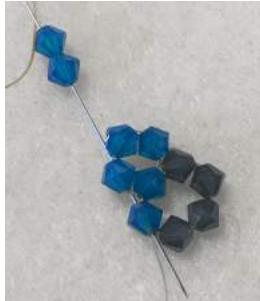

We have 6 crystals.

B

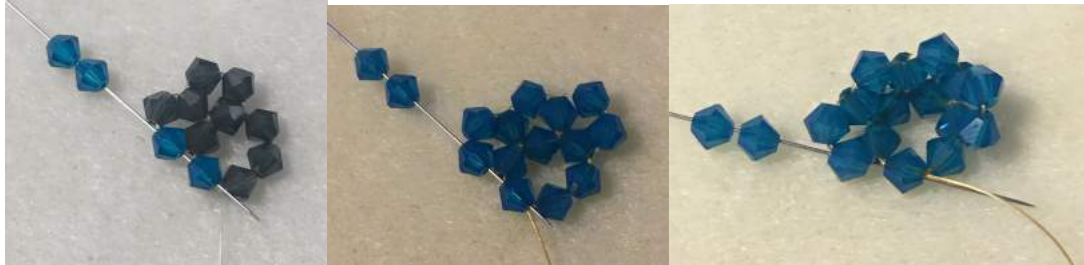

Come out in one of the crystals, add 3 crystals and pass through the same crystal but in the opposite side.

C

Pass through the next crystal of the original 6, add 2 more crystals and pass through the previous crystal (of the group of 3 placed before) and for the same crystal that you are but in the opposite side. Repeat this step 2 more times, until you have only one of the original 6 crystals.

D

Go up on the last crystal placed before then add one crystal and pass through the crystal just in front.

PANTS

STEP 8

Now we will make one side of the pant, making prismatic right angle weave using 3rc, around the six 2rc that we place in the step 7 of the doll. You have to have 6 crystals on the points.

STEP 9

step 8 but this time using 4rc.

Repeat 2 times

STEP 10

more times using now 4bc.

Repeat 2

STEP 11

Finally repeat one time using 1bc.

STEP 12

Now you have to fill the empty spaces between the crystals, using 11sb passing through between them.

Go up to the next line of 4bc and fill the spaces using 8sb.

Then fill the spaces between the 2 lines of 4rc using 2rc.

Go up to fill the line made with 3rc, using 11sb.

Then fill the spaces in lines of 2rc and 1rc using 15sb.

STEP 13

To fill the spaces in the line made with 15sb, use 15sb in one space and the other just pass through the next seed bead without add anything.

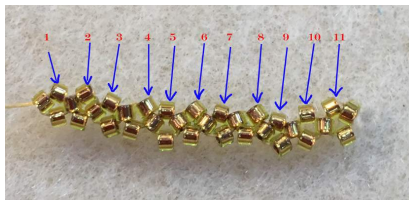

STEP 14

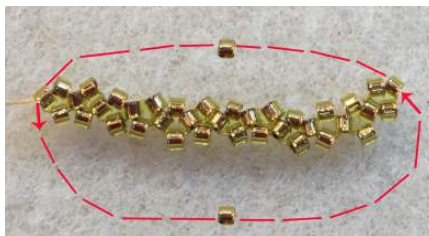

To make the other side of the pant repeat steps 8 to 12.

THE TOP

STEP 15

Make 11 right angle weave using 15sb.

of the breast of the doll.

Then close the right angle above

STEP 16

Make a right angle using the points of the 15sb placed in the down side, using 1rc.

STEP 17

Fill the spaces between the crystals one space using 11sb and the other just passing through the next crystal.

STEP 18

Now you have to make a right angle just using the 11sb placed before, for that come out in one of the 11sb and make a right angle using 15sb.

STEP 19

Now go to the point of the 15sb in the up side of the top of the doll, come one in the first 15sb on the point just next to the arm, add four 1rc, skip the next point and pass through the next.

Pass through the next point without add anything, then add four 1rc, skip the next point y pass through the next.

STEP 20

Continue to the back of the doll and fill the spaces between the points using two 15sb.

STEP 21

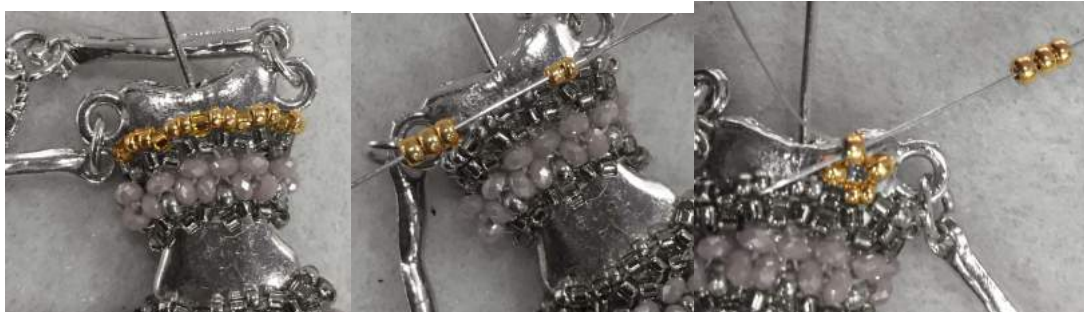

Travel to the front and come out in the 15sb on the point that we start in step 19, add ten 15sb and pass through the 15sb just after the crystal, then pass through the next point without add anything.

Repeat the same process.

STEP 22

Go to the back of the doll and pass through the two 15sb placed in one of the sides of the arms, add three 11sb and pass through the two 15sb but in the opposite side, travel to the point of the three 11sb added and repeat the right angle one more time.

STEP 23

Go to the point of your last right angle, add one 11sb and pass through the two 15sb in the other side of the doll (the front side).

Add one 11sb and pass through the 11sb that we start.

STEP 24

Go to the point of the 11sb out side of the arm in the right angle that you made in the previous step, add three 1rc and pass through the same 11sb but in the opposite side.

Repeat the same process 3 more times.

STEP 25

Travel to the point of the 1rc placed in the out side of the arm, and repeat the step 24 using 3rc.

STEP 26

Go to the other side and repeat steps 22 to 25. Then fill the spaces between the crystals of the sleeves using 15sb.

THE PURSE

STEP 27

Make 4 right angle weave using 15sb.

Go to the point of the 15sb and make 4 more right angle using 1rc.

Now make 4 right angle using 2rc.

Make 4 right angle using 3rc.

Make 4 right angle using 4bc.

STEP 28

To make the next right angle we have to combine sizes, start adding one 4bc + one 3rc + one 4bc and pass through the same crystal but in the opposite side, then go to the next point.

Add one 4bc + one 3rc and repeat the same process that we are used to make the right angle, repeat this process 2 more times.

STEP 29

Making the same process that we used in step 28 make 4 right angle using 3rc and 2rc.

STEP 30

Continuing with the same process make 4 right angle using 2rc and 1rc.

STEP 31

Make another 4 right angle using 1rc and 15sb.

STEP 32

Make the last 4 right angle just using 15sb.

STEP 33

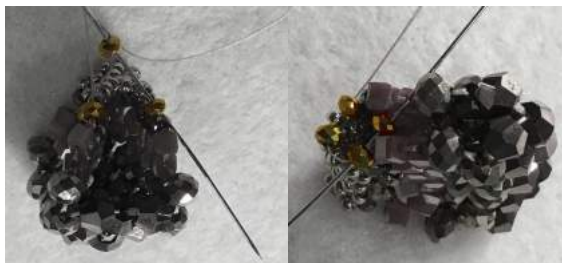

Attach both sides of the right angle passing through both points adding one 15sb in each side of the points.

Continue attaching the points adding one 15sb between then until the 4 points are attached.

STEP 34

To attach the sides of the purse repeat the same process that we used in the previous step (step 33), but using the crystal who it with the size, first attaching with 1rc.

Then using 2rc.

Finally using 4bc. Repeat in the other side.

STEP 35

Now we have to fill the spaces between crystals, fill the spaces between 4bc using 8sb, in line of the bottom, the next line with the 3rc do the same using 8sb.

Go to the next line, to the 2rc and fill the spaces using 11sb.

Go to the next line, to the 1rc and fill the spaces using 15sb. Repeat all the process in the other side.

STEP 36

Now travel to one of the sides on the top, come out in the 15sb and add 15 more 15sb and pass through the 15sb placed in the other side of the purse.

THE HAIR

STEP 37

Take sixteen 11sb, make a circle, then come out in one of the seed beads, add one 11sb and pass through the same seed bead but in the opposite side.

Pass through 4 seed beads and repeat the process, repeat 2 more times until you have 4 seed placed.

STEP 38

Travel to one of the 11sb placed previously, add two 15sb and pass through the next 11sb of the group of 4 placed before, repeat this process 3 more times and tighten.

STEP 39

Come out in one of the 11sb in the circle of 16, add (25) 15sb, skip the last seed bead and pass back through all the next 24 seed beads and through the 11sb that we start, repeat this process 9 more times. Once you finish the hair, put it on top of the

STEP 40

Put the pearl into the pin, then the hair.

Congratulations!
