Clasp

Design and bead count above are for the full length of the bracelet design which is 20cm in length (without the clasp).

You will need to adjust the length of the piece created based on wrist size and clasp used.

Z indicates the space where the clasp is stitched into the bracelet, you will need to match this position when sewing in the clasp in the last row. This will need to be stitched in on an even numbered row.

This piece uses odd count peyote turns (all of the even numbered rows are odd count). There is a guide to odd count peyote turns at the end of the pattern and a link to a demonstration video.

Stitches Used

Peyote - an off-loom beading technique, it can be worked with either an even or odd number of beads per row.

Instructions - Odd Count Peyote

Odd count peyote has an odd number of rows, which creates a centre line in your piece, but requires a special turn at one end.

This video is a demonstration of the odd count turn.

1:

As you come to the end of the row, there is no bead to thread into in order to complete the row - so you will need to add the bead.

2:

Pick up a bead

(this will be the first bead indicated in the next row in the pattern) (orange in the photo)

Pass your needle through the last bead on each of the last three rows of stitching. (Orange green blue in the photo)

3:

You now need to complete a turn to move the thread back up to the first row (orange row)

To do this pass your needle up through the second bead from the edge of the third row. This creates a loop of thread in your piece.

4:

Pass back through the last bead on the second row (green) and through the second bead from the edge of the first row (orange)

5:

To complete the turn pass the needle back through the bead added in step 2.

Adding the clasp

You will need to add this as you are starting the bracelet, as you finish you will need to stitch it in on the odd count row (as you are approaching the turn)
