

Celtic Knot

Created by William Minter for
Beadworkers Guild 2026

Project Details

20 rows

627 beads

With size 15/0 Miyuki Delica beads, the project measures 4.8 x 4.15 cm (1.88 x 1.63"). This is the measure along one side x from one point to the opposite side.

You can use other sizes and colours, as you like. Suitable for beginners.

This project is perfect as a brooch, or you can assemble multiple samples for a larger project. The word chart is given according to the beading method in Julia Pretl's fantastic animation here: <https://www.youtube.com/watch?v=mXFIn3pvsWg>

If you are unfamiliar with peyote triangles, this animation will show you how to complete the project, start to finish.

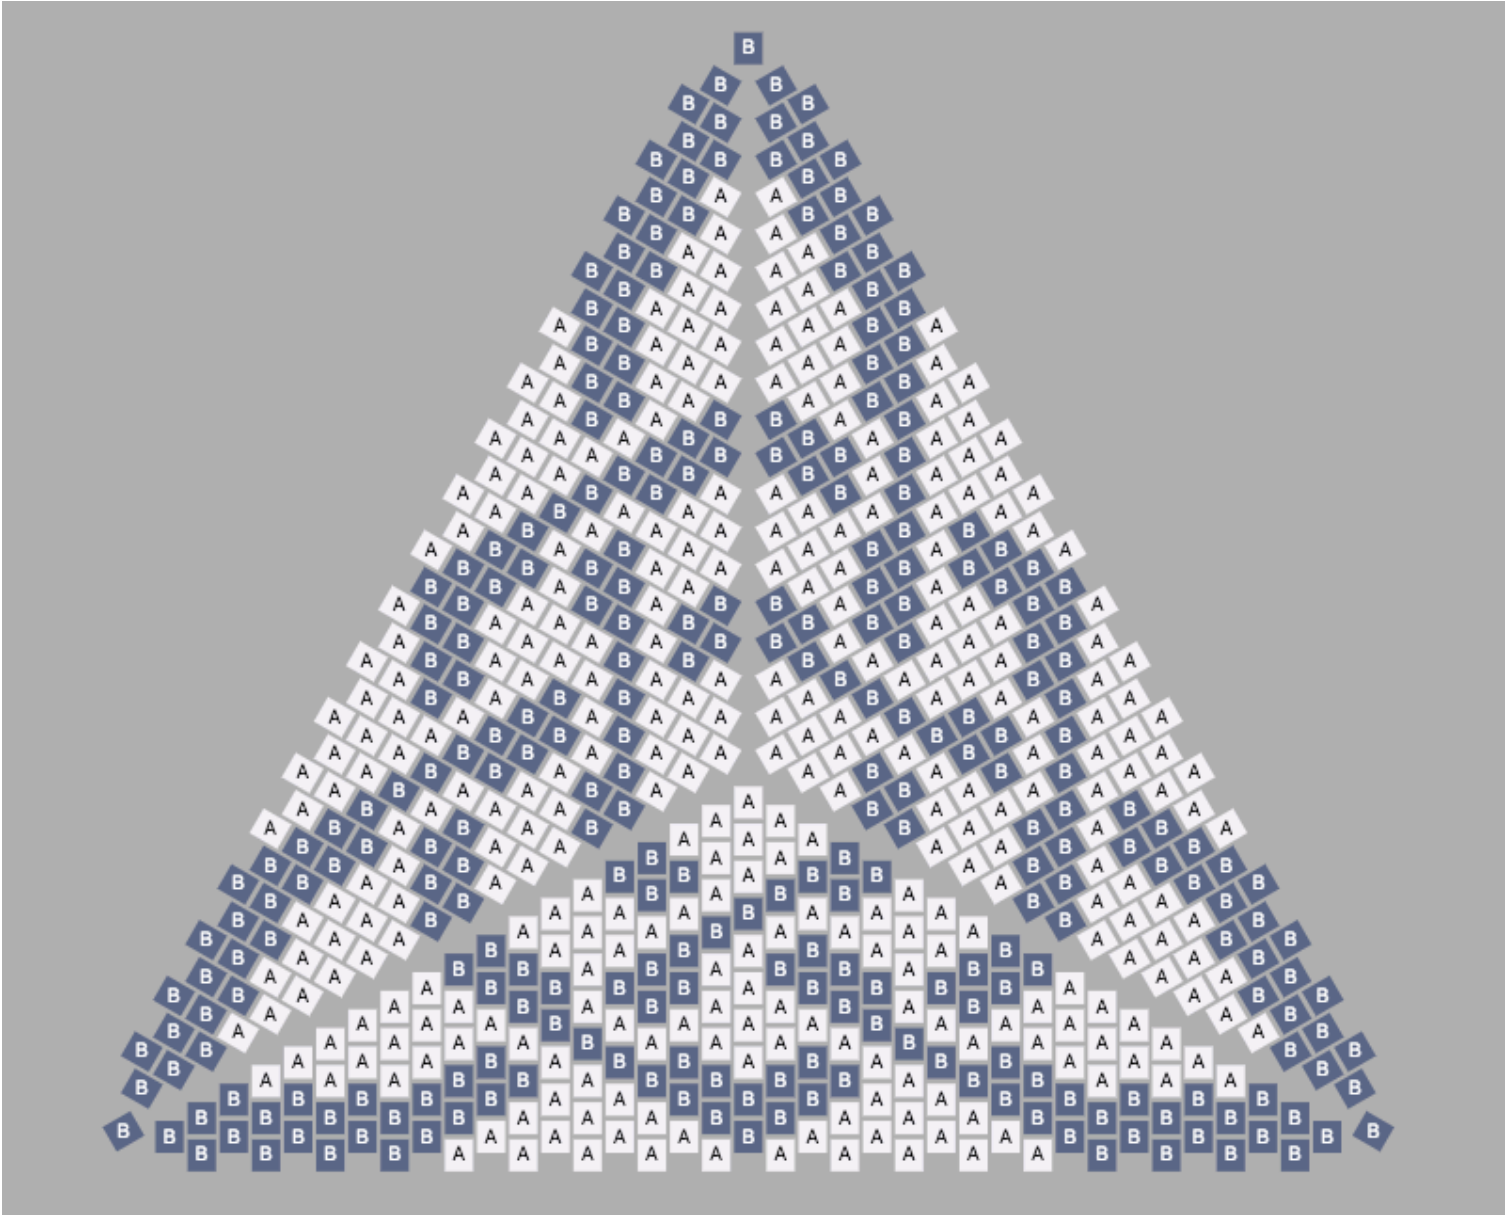

You are welcome to use the project for any purpose (including commercial use). If you do, please just mention that the pattern was designed using the [Beadographer](#) app.

Happy beading!

Will and Leah
